DETAILED ACTION

1. The amendment filed June 26, 2006 is entered and claims 4-6, 8, 10-13, 15-18, 20-22, 24-26, 29, 35-37, 39, 41-42, and 44-49 are pending.

Allowable Subject Matter

2. Claims 4-6, 8, 10-13, 15-18, 20-22, 24-26, 29, 35-37, 39, 41-42, and 44-49 are allowed.

3. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a method for supporting multiple displays per drawing surface.

Independent claim 4 identifies a uniquely distinct feature "using the selected display capabilities of the second display with said first display and wherein step (a) further comprises receiving the capability parameters in accordance with a system start-up".

Independent claim 8 identifies a uniquely distinct feature "wherein the memory further comprises operational instructions that cause the processing module to determine the selected display capabilities of a second display based on a composite of the display parameters of each of the multiple displays to allow displaying of at least a portion of the drawing surface on both of the multiple displays".

Independent claim 13 identifies a uniquely distinct feature "fourth storage means for storing operational instructions that cause the processing module to determine the selected display capabilities based on a composite of the display parameters of each of

the multiple displays to allow displaying of at least a portion of the drawing surface on both of the multiple displays”.

Independent claim 20 identifies a uniquely distinct feature “providing the selected display capabilities of the second display to an operating system and using the display capabilities of the second display with each of said multiple displays and wherein step (a) further comprises receiving the capability parameters in accordance with a system start-up”.

Independent claim 24 identifies a uniquely distinct feature “wherein the memory further comprises operational instructions that cause the processing module to receive the capability parameters in accordance with a system start-up”.

Independent claim 35 identifies a uniquely distinct feature “providing the selected display capability parameters of said second display to an operating system and using the display parameters of said second display with other displays of the multiple displays and wherein the display capability parameters are received in accordance with system start”.

Independent claim 39 identifies a uniquely distinct feature “wherein the memory further includes operational instructions that when executed cause the processing module to receive the display capability parameters in response to a monitor change process”.

The closest arts, Kotha et al. and Zenda as discussed in the previous Office Action, either singularly or in combination, fail to anticipate or render obvious the above limitations obvious.
